COMPANY

Engineering the **Digital Future**

Niftech is a global digital engineering and technology execution partner focused on building scalable, high-performance systems for enterprises, financial institutions, and fast-growing companies. Through our mature engineering practices, deep technical expertise, and a culture of ownership, we deliver transformative technology solutions that accelerate innovation and growth for our clients.

“ *Great technology is built by great people. Our mission is to turn expertise and creativity into real-world transformation. – Owen Bulpett*

What is Niftech all about?

Our Beliefs and Shared Values

Productivity

Productivity that moves the needle

Growth

We grow ourselves to grow together

Performance

Delivery is our baseline, not our goal

Effectiveness

Be effective – not just correct

Partnership

We lead together, we win together

Time

Time is our most valuable asset

Scale

Standardize to scale with confidence

End User

The end user guides every decision

Learn

Learning is a continuous discipline

Our Leadership and Team

Bryan Fortunato 

COO

Bryan brings 8 years of operational expertise across workflow optimization, delivery management, and strategic execution. He ensures seamless performance across teams and drives operational excellence throughout the organization.

Owen Bulpett 

CEO

Owen is a seasoned executive with 24 years of corporate leadership across the UK and Europe. His experience spans multiple industries and regions, guiding Niftech's direction, culture, and long-term growth.

Anastasia Kutepova 

Managing Director

Anastasia is an accomplished leader with a diverse professional background, previously serving as Director of Productions and later as Regional Director for Maxim. She leads Niftech's strategic initiatives, and organizational development.

Our Leadership and Team

Muhammad Asif 

CTO

Mr. Asif has been a technologist for over 15 years having led technology development for clients like NHS (UK), Zoopla Property Group, Llyod's Bank.

Syyed Humaam 

Sales Director

Humaam is a seasoned media professional. He is an alumni of UNESCO creative economy program. He has led an IT company for over 8 years, worked with Start-ups and enterprises.

Ammad Jami 

Technology Partner

Ammad has been a technologist for 20 years having led technology product development for global firms like Thomson Reuters.

Our Leadership and Team

Yousuf Hamid 
General Manager

Youssef combines strategic vision with unmatched dedication, consistently turning emerging trends into meaningful business outcomes.

Zeba Waqar 
Brand Manager

Zeba Waqar is passionate filmmaker with over 5 years of experience in promotional media management. She has completed over 2000+ projects for clients in the US, UK, Turkey and Australia.

Sahrish Ahmed 
Creative Manager

Sahrish is a film graduate and an actress, her skills in social media marketing, strategic planning, makes her a pivotal force in our creative domain.

OUR PROPOSITION

Precision Engineering + Scalable Delivery

We operate on a dual foundation

1. 360-Degree Engineering Practice

A complete engineering ecosystem covering product strategy, UX, development, testing, DevOps, cloud, security, and performance optimization.

2. Holistic Team Augmentation

Access to global engineering talent that integrates directly into clients' delivery environments, enabling velocity without compromising quality.

“ *The combination enables Niftech to deliver unmatched execution value—speed, precision, and reliability across every project phase* – Muhammad Asif

We Partner to Serve

Enterprises

- ✓ Reduce heavy OPEX with flexible scaling
- ✓ Modernize legacy systems with cloud-native tech
- ✓ Accelerate delivery through a product-engineering model
- ✓ Build long-term digital ecosystems

Technology Vendors

- ✓ Trusted engineering teams & dedicated pods
- ✓ On-demand capacity expansion
- ✓ Certified specialists across platforms (AWS, Azure, Salesforce, etc.)

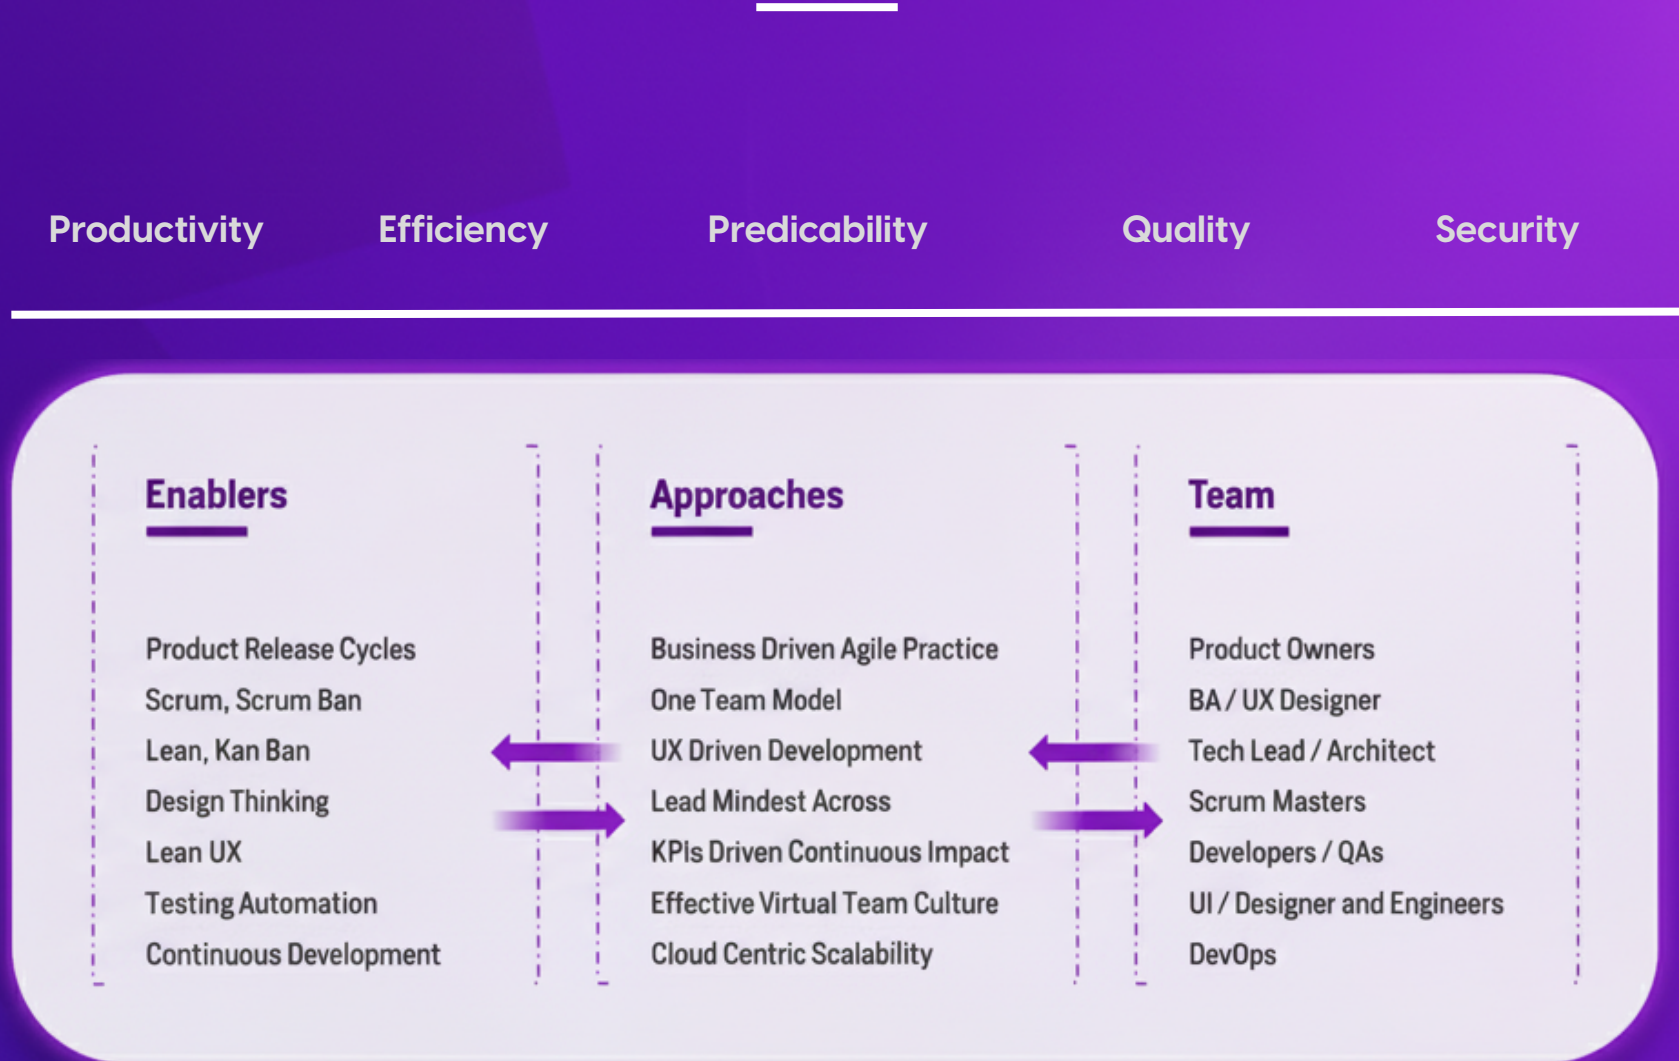

Startups

- ✓ We handle technology while founders focus on vision
- ✓ Faster go-to-market with optimized engineering
- ✓ True agile development at scale
- ✓ Cost-efficient product and MVP development

Consulting Firms

- ✓ Execution partner for delivery-heavy projects
- ✓ Pre-sales, architecture support & development
- ✓ Domain-specific engineering teams
- ✓ Full delivery responsibility

360° Engineering Practice Framework

FOCUS AREAS

Development & Implementations

Our Focus Areas Include

Product Development

Agile Development
UX Driven Development
Portals
SAAS Products

AI for Future

Computer Vision

Custom platform

Low Code Platforms

Outsystems
Salesforce

Note: These are some of the areas where we focus but not limited to

Our Platform Practices

- Handling several large scale projects in US and Europe.
- Dedicated 24x7 team in dev, design, support.

- Managed services on AWS, Azure, Alibaba, GCP
- Terraform, Docker, Kubernetes Implementations
- Teams/Resources outsourced on different cloud based technologies

- Global Development partner.
- Integration products for BFSI.
- No-code cloud based platforms.
- ET Platform Support.

- Going into a major implementation partnership.
- Teams with extensive experience.
- Implementation team led by Acquia and Drupal Grandmasters.

- Hold a growing pool on Outsystems.
- Consultants and Developers with good number of use case developments.
- Working towards building a global practice.

- Going into a major implementation partnership.
- Leaders who have dealt with major SFDC based product development.
- Teams on SFDC covering marketing cloud, service cloud, commerce cloud, etc.

SUCCESS STORIES

Some of our many success stories

01

Fintech Platform - for a KSA Company

Micro Cash Borrowing/Lending Solutions

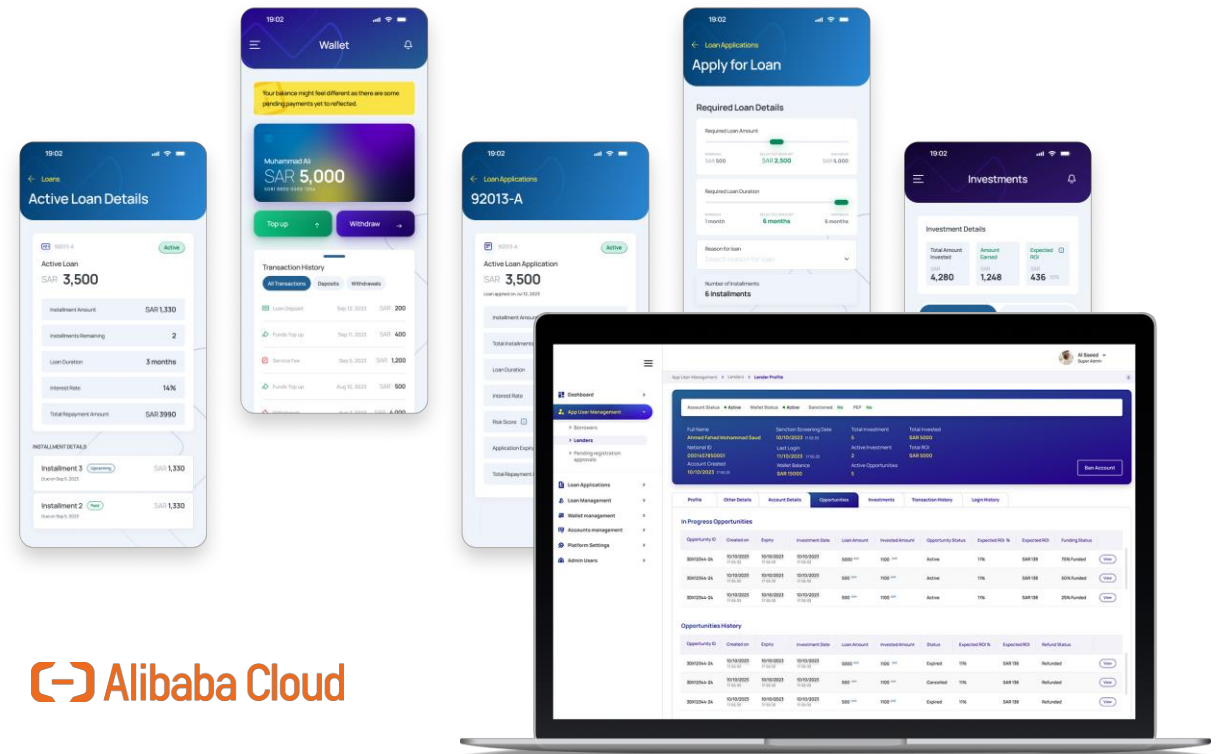

We have built a cash borrowing and lending platform for a SAMA regulated fintech firm in KSA. The overall platform was designed for its modern and effective user experience as a mobile app to be used by common borrowers and lenders in KSA. The overall platform controls and regulates the borrowers leveraging around 10 different external integrations including with the likes of Nafath, ELM, Nafith, Masdar, etc. The platform also includes a virtual account wallet module for users as well as multi level integration with Bank's B2B omnibus account services. The overall platform is deployed on Ali Baba Cloud in a highly secure infrastructure. The overall solution is built on scalable microservices architecture using event driven and message queue based capabilities.

Services Provided

- ◆ UI/UX Design
- ◆ Mobile App Development
- ◆ 10+ external integrations
- ◆ Microservices based Backend
- ◆ Admin Panel
- ◆ Deployment on Ali Baba Cloud

Value Delivered

- ◆ End to End Design and Development in record time
- ◆ Complete Product Design and Build
- ◆ Highly adaptive Agile oriented development
- ◆ Full technology partnership

Trading Terminal – Confidential

High - Performance Trading Terminal for US Market

We developed a full-fledged, high-performance trading terminal from the ground up for a US-based financial entity, designed to meet the demands of institutional traders. The terminal, built for Windows-based multi-display workstations, supports Equities and Options trading and is poised for launch in the US market. Our team designed and developed an intuitive, high-performance UI/UX and seamlessly integrated it with the client's existing back-end infrastructure.

Future Scalability

With a robust and efficient architecture, the terminal is designed to scale and will support FX and Futures trading in future phases.

Services Provided

- Front - End Development
- Seamless integration with back-end services

Value Delivered

- ✓ Optimized UI/UX for professional traders
- ✓ Accelerated development & testing for faster time-to-market
- ✓ Deep in-house expertise in both trading business and technology

IDC Adaptor

Dynamic Integration in banking. Redefined

IDC Adaptor is an Enterprise Integration software built to integrate FX Trading and Islamic Dealing platforms with the Core Banking systems. It provides the ease of deployment, platform independence, integration with the diversified backend middleware infrastructures and customization. Currently handling FIX, TOF and XML protocols from the provider side whereas providing the transformed data to almost all formats to the consum side. The adaptor handles variety of conventional and Islamic deal types in both FX and Money Market. The growing need of Islamic trades integration makes the adaptor an attractive choice for every Bank in the Middle East market.

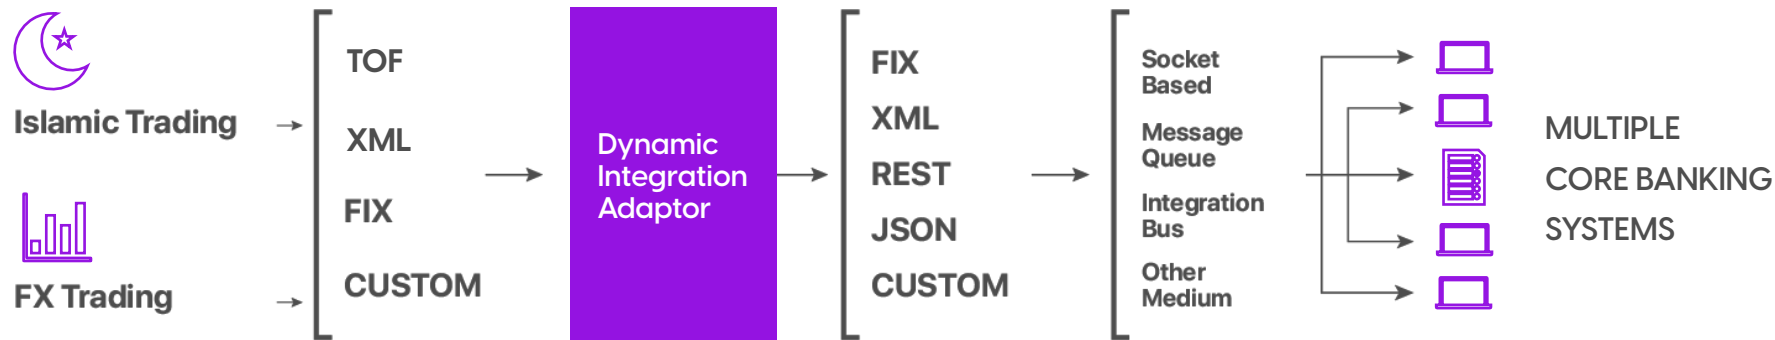

Services Provided

- ◆ Software development
- ◆ Integration & testingment
- ◆ Admin Control Development
- ◆ Users guides and Tech doc

Value Delivered

- ◆ Highly configurable integration software
- ◆ Handles big number of existing implementations
- ◆ Scaling the adaptor for future
- ◆ Solves the problem of merging old and new workflows

Integration Platform

Biometric Product Suite

A complete mobile biometric suite enabling real-time identity verification across OCR, fingerprints, and facial recognition

We developed a powerful, end-to-end biometric product suite designed to seamlessly integrate into mobile applications for instant identity verification during customer onboarding. The suite combines AI-driven OCR, fingerprint matching, and facial recognition into a single lightweight mobile SDK, built to meet the stringent demands of financial institutions, digital banks, and high-volume onboarding platforms.

Our solution enables automatic ID data extraction, high-accuracy finger matching connected to national databases, and real-time facial verification—ensuring secure, frictionless digital onboarding. The SDK is optimized for mobile environments, delivering fast processing, low latency, and superior matching accuracy while integrating effortlessly with existing back-end systems.

Future Scalability

With a modular and efficient architecture, the suite is designed to scale with evolving compliance requirements and will support advanced biometric modalities and additional regional identity databases in future phases.

ID OCR Reading

- ✓ Auto read / fill data from ID card
- ✓ Capture/Save pic and signature
- ✓ Capture/Save card image

4 Fingers Matching

- ✓ AI based recognition & segmentation
- ✓ Connects national database realtime
- ✓ NFIQ2 based finger assessment

Facial Recognition

- ✓ Embeds seamless in mobile app
- ✓ Liveness matching scenarios
- ✓ Matching live face with ID photo

Napier AI is an Anti Money Laundering Platform with AI capabilities helping enterprises in their risk and compliance needs. DIFC is a leading hub for financial institutions based in Dubai. DIFC took Napier's platform for implementation which had a pre-requisite for a complex setup of on-premise Kubernetes environment. Our experienced team of experts have done a flawless smooth implementation of K8 including integration of monitoring tools. The overall UAT and Production Environments are setup via very close collaboration between 3 different teams.

Service Provided

- ◆ Linux Installations
- ◆ Configurations as per Napier AML
- ◆ Setup K8 Clusters
- ◆ Support for K8

Value Delivered

- ◆ A highly configurable integration software
- ◆ Handles big number of existing implementations
- ◆ Solves the problem of merging old and new workflows
- ◆ Scaling the adaptor for future

Usual Approaches in Resourcing

	Strengths	Challenges
Insourced Teams	<ul style="list-style-type: none"> People Integrated Internal Knowledge Ownership 	<ul style="list-style-type: none"> High Fixed OPEX Not Core Business Scale Issues
Projects Outsourced	<ul style="list-style-type: none"> Responsibility Specialists Quality Assessed 	<ul style="list-style-type: none"> Not One-Team Scope not Value Lack Agility
Marketplace	<ul style="list-style-type: none"> Open Talent On Demand Big Supply 	<ul style="list-style-type: none"> Not Integrated Cultural Alignment Quality

Niftech's Approach

- On Demand Resources → Cost Efficient
- Full Tech Partnership → Responsibility
- Fast Growing Pools → Offer Scale
- Global Virtual Network → Remote Effectiveness
- One Team Model → Focus Business Value
- Resources share Revenue → Ownership
- Pre-engagement Specialists → Fast Integration
- Top talent & specialists → Modern Tech
- People Company → Culturally groomed
